Educational Facility Guide

Update Your Educational Institution with High-Performance Paints and Coatings

Benjamin Moore Products for Educational Facilities

Educational institutions have an important job: moulding our future artists, professionals, labourers, and leaders. The task requires unmatched excellence in facilities management. Benjamin Moore is your single source for the high-performing paints and coatings that will help you keep your educational facilities operating cleanly, effectively, and safely.

A leading manufacturer of premium-quality residential and commercial coatings, Benjamin Moore offers various products that meet the specific needs of educational institutions, including...

- Chalkboard paint for classrooms
- Low- and zero-VOC paint for dorm rooms
- Field-marking paint for athletics
- Scuff-resistant paint for high-traffic hallways and stairwells

Our coatings and colours establish an inspirational environment for learning. Let us help you protect and beautify your facility with minimal disruption, increased cost efficiency, and excellent results.

No matter the surface,
Benjamin Moore has
just the right coating
for your facility.

INTERIOR

- 1 Advance® Waterborne Interior Alkyd** delivers the flow and levelling of an alkyd in a low-VOC formula that cures to a smooth, furniture-like finish.
Perfect for: Bookshelves, cabinets, doors, trim
- 2 Aura® Bath & Spa** is the choice when only the best results will do. Benjamin Moore's highest-performing paint delivers rich, deep colours with its proprietary Colour Lock™ technology, which locks colour into the film. Bath & Spa provides a mildew-resistant coating for high-humidity environments in a matte finish.
Perfect for: Pool areas, locker rooms
- 3 Insl-X® Chalkboard Paint** turns any paintable surface into a chalkboard of any size or shape.
Perfect for: Cafeterias, classrooms, faculty lounges and offices, common areas
- 4 Coronado® Rust-A-Void™** coatings are suitable for interior and exterior steel and metal surfaces.
Perfect for: Metal railings and trim
- 5 Command®** is an extremely durable, single-component, multi-substrate waterborne acrylic urethane ideal for applications where minimal maintenance disruptions and quick returns to service are required.
Perfect for: Railings, trim, steps, stair risers
- 6 High Performance 100% Solids Epoxy** provides heavy-duty protection for floors exposed to student and faculty foot traffic, moisture, spills, and frequent cleaning.
Perfect for: Interior floors
- 7 High Performance Polyamide Epoxy** is a multiuse epoxy designed for substrates that require a durable coating in severe or exposed environments.
Perfect for: Parking garage walls and ceilings
- 8 High Performance Pre-Catalyzed Waterborne Epoxy** provides a tough, durable film for walls, ceilings, and trim. The low-VOC waterborne formula makes this product ideal for putting spaces back into service quickly.
Perfect for: Kitchens, food service areas, loading docks, locker rooms, restrooms
- 9 High Performance Waterborne Epoxy** produces an extremely durable, chemical-resistant floor coating with the benefit of low VOCs and soap-and-water cleanup, allowing painted areas to be occupied sooner.
Perfect for: Interior floors
- 10 Insl-X® Pool Paints** offer a variety of solutions for different swimming pools. Products include epoxy, rubber-based, and waterborne formulas, all of which deliver excellent durability over a variety of existing swimming pool surfaces.
Perfect for: Swimming pools, fountains
- 11 Insl-X® Stix® Waterborne Bonding Primer** is an acrylic-urethane primer/sealer with tenacious adhesion to the most challenging surfaces, including galvanized metals.
Perfect for: Metal railings and trim
- 12 Eco Spec®** is CERTIFIED **asthma & allergy friendly®** based on achievement of strict criteria for VOC emissions, odour, and performance.
Perfect for: Dormitories
- 13 Regal® Select** delivers excellent durability and withstands scuffs and burnishing from everyday wear and tear—it stands the test of time. With stain-release technology, stains wash away easily, leaving a beautiful finish.
Perfect for: Faculty and administrative offices, lounges, meeting spaces

- 14 Ultra Spec® 500** is the professional choice for a zero-VOC interior coating that completes large paint jobs with less effort. It dries quickly for faster job turnaround and touch-ups blend seamlessly. Eligible for LEED® v4 credit and MPI-approved in multiple categories.
Perfect for: Auditoriums, dormitories, hallways, large classrooms, lecture halls, libraries
- 15 Scuff-X®** delivers unmatched scuff resistance in a single-component, high-performance latex formula. Scuff-X will continue to resist scuffs in high-traffic areas long after other paints have failed, resulting in big savings.
Perfect for: All high-traffic areas, cafeterias, classrooms, common areas, foyers, gymnasiums, hallways, libraries, locker rooms, storage rooms

EXTERIOR

- 16 High Performance Acrylic Sealer** is an easy-to-apply and fast-drying clear waterborne seal coat for bare concrete and other masonry surfaces. It is designed to allow for easy sweep up of dust and helps to maintain the natural appearance of the substrate.
Perfect for: Split face block
- 17 High Performance DTM Mastic Urethane** is a high-solids, rust-inhibitive, surface-tolerant urethane that is excellent for protecting metal substrates.
Perfect for: Tank exteriors and other exposed steel structures
- 18 Insl-X® Latex Field Marking Paint** is specifically designed for use on grass, artificial turf, concrete, or asphalt. It is a fast-drying semipermanent coating for line marking or artistic graphics. Its water-based formula will not affect grass.
Perfect for: Outdoor athletic fields
- 19 Insl-X® TuffCrete® Concrete Stains** are designed for application to interior or exterior masonry surfaces and offer great durability. Available in waterborne and solvent acrylic formulas.
Perfect for: Sidewalks, courtyards, walkways
- 20 Insl-X® Traffic Coatings** are specially designed for painting parking spaces, loading zones, and other traffic lines. Products include latex and alkyd formulas, as well as a fast-setting traffic paint.
Perfect for: Access roads, driveways, loading docks, parking lots
- 21 Insl-X® Tru-flex® Recreational Coatings** are specially designed to coat and line a variety of playing courts for tennis and other outdoor sports. Tru-flex includes Concrete Bond Coat, Cushion Coat, Line Marking Paint, Neutral Filler, Patch N Level, Smooth Coloured Finish Coat, and Textured Coloured Finish Coat.
Perfect for: Outdoor athletic courts
- 22 Ultra Spec® EXT** provides maximum protection and adhesion to a variety of exterior surfaces. It offers excellent coverage and easy application, and can be applied in temperatures as low as 5 °C (40 °F).
Perfect for: Wood, hardboard, vinyl, aluminum, fibre cement, stucco, cinder block, unglazed brick
- 23 High Performance DTM Acrylic Enamels** provide corrosion control and protection for interior and exterior metal substrates.
Perfect for: Metal pipes, siding, mechanical equipment
- 24 Aura® Exterior Paint** provides excellent fade resistance with long-term durability and UV protection.
Perfect for: Wood, hardboard, vinyl, aluminum, fibre cement, stucco, cinder block, unglazed brick

Your Partner in Facility Maintenance Coatings

When you choose to work with Benjamin Moore®, you will benefit from a true partnership in coatings management. The following support is available to you, in addition to our industry-leading product quality:
